

The fact that you want to limit the services of XM Radio so they will not be able to broadcast local information is wrong. I listen and most importantly PAY for the wonderful and divers programing that XM has to offer. I could not think of a day without it. They have been playing fair at all times. The NAB is just scared of this new and wonderfull technology. XM gives us freedom to listen to exactly what we want and in a quality that surpasses any other form of entertainment. Getting local information like weather forecasts is no more different than turning to the weather channel or a weather radio to get local weather forecasts. Just because they have made it a national broadcast that anyone can hear and you have no control over it your upset. Nock it off how is it hurting anyone. I pay for my service like anyone else and I feel your wanting to control them is against their rights. Instead of waisting my tax money on such a peddy issue why don't you do something that helps the entire nation by solving a problem of greater magnitued. I AM AGAINST YOU (FCC, NAB) AND FOR THE XM RADIO CORPORATION WHO KNOW WHAT WE WANT TO HEAR. SORRY IF I SOUND HARSH BUT, COME ON FOLKS GET A LIFE. WE LOVE OUR XM RADIO AND IT IS HEAR TO STAY WEATHER CHANNELS OR NO WEATHER CHANNELS. SUCK IT UP AND DEAL WITH IT.
